Judicial Branch – Supreme Court Commissions Project

The lawyer reporting modules (continuing legal education and client security) were placed in production operation in late February of 2006. Over eight percent of the total filings of each form were filed online during the 2006 filing season. In addition, lawyers are using the online system to submit applications for extension of time to complete CLE requirements, to submit CLE programs for review, and to request inactive or retired status. Once implementation of the final module of the project is substantially complete in December, the commissions' staff members will begin outreach activities to encourage lawyer use of the online system during the 2007 reporting period. Commissions' staff members expect significantly higher online filing rates by lawyers during the 2007 reporting period.

The public information module was placed in production operation in April of 2006. Members of the public now may search the lawyer database and the lawyer discipline database for public information regarding Iowa lawyers, including source documents for approximately the past twenty years of public discipline, at: <http://www.iacourtcommissions.org>.

The CLE sponsor module was placed in production operation in August of 2006. The Commissions staff is bringing CLE sponsors online gradually as users of the module. Since the CLE sponsor module was activated, approximately 10% of the sponsor CLE applications have been submitted online. That percentage is increasing each month as additional sponsors receive their instructions and registration information for use of the site.

Development of the certified shorthand reporter module is complete. It was activated for CSR reporting the week of October 16th. Announcements regarding availability of online CSR reporting were mailed to the reporters on October 24, 2006 in time for the annual CSR reporting period, which concludes on November 30th. Slightly less than one-third of the CSR annual reports filed so far have been submitted using the online reporting module.

The remaining module to be implemented is the Interest on Lawyer Trust Account (IOLTA) interest reporting module. Final testing of the production edition of the IOLTA module is expected to begin with a limited set of banks during early December, with full implementation expected in January.

Iowa Board of Medical Examiners (IBME) Iowa Credentialing

At this point in the Iowa Credentialing Project, we are awaiting Iowa Interactive's finalization of the Board of Medical Examiners Database and the connected Iowa Credentialing Coalition's database. In addition, Iowa Interactive and the Iowa Medical Society and the Iowa Medical Group Management Association need to complete the contracting process for the Credentialing Coalition's database. Once these aspects come together, we will be ready to load the systems with real data from the physicians who are already licensed in Iowa. Future users will pay for data entry and use of the data; these aspects are defined in the contract.

Department of Natural Resources (DNR) Wastewater Discharge Permit System

For the NPDS development project, a start-up meeting is scheduled between ITE staff and NPDES staff for October 24. The purpose of the meeting is to check on status of the project since the last grant from IOWAccess and to see what work needs to be completed. The request DNR made to ITE is to complete the project in 6-months. Since ITE did not ask for longer time line before accepting the work, DNR assumed 6-month is acceptable to ITE.
